Supplement 1. Effects of shrimp meal and yam bean inclusion on *in vitro* digestibility of dry matter and crude protein.

Dietary groups[1]	IVDMD (% on DM basis)[2]	IVCPD (% on DM basis)[3]
Control	62.91±3.19	64.90±3.73
SM10YB0	58.89±1.34	64.45±1.03
SM10YB3	60.59±2.56	68.50±1.73
SM10YB6	59.30±1.51	69.67±1.21
SM10YB9	59.11±0.88	69.12±1.73

[1] SM = shrimp meal; YB = yam bean

[2] IVDMD = *in vitro* dry matter digestibility. The values represent the mean values ± standard deviation of triplicate analyses (in dry matter).

[3] IVCPD = *in vitro* crude protein digestibility. The values represent the mean values ± standard deviation of triplicate analyses (in dry matter).
